

SOLARWINDS WEB HELP DESK

FULLY INTEGRATED TICKETING & IT ASSET MANAGEMENT SOFTWARE

 **DOWNLOAD FREE TRIAL**

Fully Functional for 30 Days

"After trialing several help desk solutions we settled with Web Help Desk which has proved far and away the best solution to our global IT support needs."

– Roddy Campbell, Group IT Manager,
Caledonian Alloys Limited

SolarWinds® Web Help Desk® is an easy-to-use and affordable Web-based IT help desk software that simplifies help desk management, and saves time and manual effort for IT technicians and help desk admins. With built-in ticketing management, asset management, change management, and knowledge base capabilities, you can centralize and automate your help desk tasks and improve customer support and satisfaction. Web Help Desk integrates with SolarWinds network monitoring, server monitoring, and remote support software for faster IT troubleshooting.

WEB HELP DESK AT A GLANCE

- » Simplifies and streamlines IT help desk processes from service request creation to resolution
- » Automates ticketing management with rule-based routing & escalation, real-time tracking, and alerts
- » Automated IT asset management for tracking and managing the lifecycle of hardware & software assets
- » Offers built-in knowledge base for self-resolution of issues, and automation of change management
- » Affordable pricing for IT technician logins—no additional cost for end-user logins or managed IT assets

FEATURE HIGHLIGHTS

Simple & Affordable IT Help Desk Software for All IT Teams

Web Help Desk offers an intuitive Web interface to centrally manage service tickets, and simplify & automate help desk tasks for IT technicians. Whether you are running IT support in a small or large organization, or if you are an MSP offering managed support services to customers, Web Help Desk is flexible and scalable to meet all your requirements.

Centralize, Streamline & Automate Ticketing Management

Web Help Desk is an easy-to-use ticketing management software that automates help desk ticketing tasks to simplify ticket creation, routing, escalation, and management.

Automated IT Asset Discovery & IT Asset Management

Web Help Desk is an IT asset management product that enables you to automatically discover your software and hardware assets, and manage asset assignments, history, and associated service requests, all from a single user-friendly Web console.

Help Desk Knowledge Management

Web Help Desk includes a built-in extensive, searchable, and easy-to-use knowledge base for technician knowledge management and for promoting self-resolution options to end-users and help reduce the number of in-bound service requests.

IT Change Management & Change Approval Workflows

SolarWinds Web Help Desk® software delivers a simple and automated process for managing and controlling change requests. You can customize change approval workflows varying from single approval to multiple approval levels.

Simplify Incident & Problem Management

Web Help Desk simplifies incident and problem management by allowing you to link multiple incidents to a problem for efficient ticket management and resolution.

IT Project Management & Business Process Automation

With the help of flexible and customizable Parent-Child relationships for tickets, Web Help Desk simplifies management of recurring tasks such as employee onboarding or termination, and IT projects such as new infrastructure setup or migration.

Help Desk Performance Reporting

Web Help Desk software provides numerous help desk reports to monitor technician performance and ticket status, as well as track customer support needs by location, real-time billing data, and incidence frequency.

SLA Tracking & Management

Prevent your SLAs from falling through the cracks. Web Help Desk ensures that you maintain all levels of service agreement. Set up 'SLA breach approaching' notifications and date-specific SLA reminder alerts for effective SLA management.

Leverage Existing Active Directory & LDAP Infrastructure

Web Help Desk software empowers you to discover and import help desk client account

Fully Functional for 30 Days

information from your existing Microsoft® Active Directory® (AD) and LDAP directories.

Web Help Desk Mobile

SolarWinds Web Help Desk offers native mobile app for Apple® iPhone® & iPad® to support push notifications for new and updated tickets.

Fully Functional for 30 Days

INTEGRATION WITH SOLARWINDS IT MANAGEMENT SOFTWARE

Help Desk Integration with Network Management & Server Monitoring Software

Web Help Desk **integrates** with SolarWinds Network Performance Monitor (NPM), Server & Application Monitor (SAM), and Network Configuration Manager (NCM) enabling you to automatically convert network & server node failure, device/interface performance & configuration issues, and critical application faults directly into help desk tickets, and assign them to appropriate IT team for faster troubleshooting.

Remote Desktop Access Connectivity from Web Help Desk

SolarWinds Web Help Desk offers **built-in integration for DameWare Remote Support** software which empowers you to directly launch a remote control session with the end-user computer from help desk trouble tickets and IT asset inventory.
